

Year 2 – Term 6

I know the multiplication facts for the 11 times table.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts instantly.

$$1 \times 11 = 11$$

$$2 \times 11 = 22$$

$$3 \times 11 = 33$$

$$4 \times 11 = 44$$

$$5 \times 11 = 55$$

$$6 \times 11 = 66$$

$$7 \times 11 = 77$$

$$8 \times 11 = 88$$

$$9 \times 11 = 99$$

$$10 \times 11 = 110$$

$$11 \times 11 = 121$$

$$12 \times 11 = 132$$

The children should be able to answer these questions in any order, including missing number questions e.g. ___ x 11 = 88

Top Tips

The secret to success is practising little and often. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once - perhaps you could have a fact of the day. If you would like more ideas, please speak to your child's teacher.

- Spot patterns – What patterns can your child spot in the 11 times table?
- Use memory tricks – For those hard-to-remember facts, www.multiplication.com has some picture stories to help children remember.
